PROFESSIONAL SUMMARY

- Aspiring software developer with project and work experience in JavaScript, React, SQL, and C++, and a strong interest in using algorithms and models to derive valuable information from data.
- Self-starter with strong communication skills and experience working with stakeholders to understand and solve business problems as a program manager at NPower Canada.

WORK EXPERIENCE

Program Manager

March 2025 - Present

NPower Canada, Vancouver, BC

- Designed and implemented automated workflows using custom scripts on Microsoft Power Automate for SharePoint, streamlining administrative processes and saving thousands of hours organisation-wide. Analyzed program outcomes by evaluating qualitative feedback and quantitative data for 1000+ learners, identifying opportunities to enhance delivery and ensure robustness of program benchmarks.

Full Stack Developer (Remote, Part-Time)

August 2025 - November 2025

HyperFX, Los Angeles, CA

- Developed frontend components and services to analyse end-user API usage and manage agentic workflows. Implemented and documented robust integrations for external tools including Calendly, Zoom and Google Analytics. Supported application reliability by resolving 50+ user- and internal-reported bugs in a continuous integration and delivery environment.

PROJECTS

HireMelon

November 2025 - Present

- Architected and developed an end-to-end Spring Boot (Java 21) and Next.js application, aggregating job opportunities and intelligently matching candidates through AI-powered analysis.
- Engineered a microservices-oriented, distributed system with PostgreSQL 17 and Redis for efficient data analysis of large datasets, implementing secure RESTful APIs with JWT authentication.
- Developed sophisticated AI analysis tools leveraging Large Language Models for automated resume generation and qualification scoring, ensuring reliability with comprehensive JUnit 5/Mockito testing and Docker containerization.

EDUCATION

Bachelor of Computer Science | University of British Columbia, Vancouver, BC

September 2025 - Present

Master of Science in Physiology | University of Alberta, Edmonton, AB

September 2016 - October 2018

Bachelor of Science in Physiology | University of Alberta, Edmonton, AB

September 2012 - April 2016

TECHNICAL SKILLS

Web Development: React, Node.js, Express.js, Next.js

Programming Languages: Python, JavaScript, TypeScript, SQL

Databases & Version Control: PostgreSQL, Git, GitHub
